

**Mathematical Methods in Reliability Research**  
**Friday 29<sup>th</sup> August 2014**  
**University of Strathclyde**  
**Expert Judgment Workshop**

**Speakers**

- Willy Aspinall (University of Bristol & Aspinall and Associates)  
"Some aspects of real world problem elicitations in practice"
- Roger Cooke (University of Strathclyde & Resources for the Future)  
"Out of sample validation for structured expert judgment WHEN is it exactly"
- Ian Dawson (University of Southampton)  
"One, Two, Many: Exploring Expert and Non-Expert Risk Judgments of Multiple Risk Factors"
- Rabin Neslo (UMC Utrecht)  
"Expert Judgment Applications within Public Health"
- Patricia Popelier (University of Antwerp)  
"Procedural rationality review: evidence-based law making as a legal obligation"
- Keming Yu (University of Brunel)  
"Bayesian quantile regression: Gibbs sampling and prior selection"
- Zoe Shipton (University of Strathclyde)  
"Do you know what it is yet? What makes geoscience experts effective at interpreting seismic images?"
- Chris Dent (University of Durham)  
"Electricity generation capacity assessment considering severe weather-driven common mode failures"
- Athena Zitrou (Scottish Water)  
"Assessing systemic risks for new generation offshore wind farms on the basis of expert judgment"
